

d.pia.lab

research • policy advice • training

The Brussels Laboratory for Data Protection & Privacy Impact Assessments,

or **d.pia.lab**, connects basic, methodological and applied research, provides training and delivers policy advice related to impact assessments in the areas of innovation and technology development.

Whilst legal aspects of privacy and personal data protection constitute our core expertise, the Laboratory mobilises other disciplines including ethics, philosophy, surveillance studies and science, technology & society (STS) studies.

The d.pia.lab **Network** brings together experts from all over the world to exchange knowledge, viewpoints and developments on privacy and data protection impact assessments. The Laboratory also invites academics, researchers, practitioners and activists to work together as **Visiting Scholars**.

Please visit **www.dpialab.brussels** for more information or contact us at:
